

Package Name: EurostatBDF

Author: Graeme Walsh

Date: 18/08/2018

Add-in Type: Global

Default Proc Name: EurostatBDF

Default Menu Text: EurostatBDF

Interface: Menu and Command Line

Description:

This EViews add-in imports datasets from the Eurostat Bulk Download Facility into EViews as a workfile object.

The Eurostat Bulk Download Facility can be found at the following address:

<http://ec.europa.eu/eurostat/estat-navtree-portlet-prod/BulkDownloadListing>

Technical Notes:

- This add-in uses the native EViews R connector interface.
- The R programming language is required to use this add-in.
- The speed of the add-in will depend on both your internet connection and hardware.
- The add-in source code is open and commented.

Interactive Use:

Running this add-in will present a @uidialog to the user. The user is then asked to choose a dataset. To do this, the user should enter into the textbox the code name of a Eurostat dataset. For example, the code name for the Quarterly National Accounts dataset is namq_10_gdp. The add-in then establishes a connection with R, downloads the data, and finally imports the data as a workfile.

Command line:

Syntax : EurostatBDF
